

"Mutual Partnership In Health Sector (**HEALTH
SYSTEM STRENGTHENING**)
In District Of Cambodia"

Delegate from, Kingdom of Cambodia
Presented by Dr. Chea SOKHIM

1st International Conference on
"Health Services Delivery Management"
at Phitsanulok, Thailand,
from 14-16 Oct.2009

1

Objective of Presentation:

To share an experience on Health
System Strengthening and Health
Service Delivery (Immunization, RH...
in Districts)

2

Background GAVI HSS

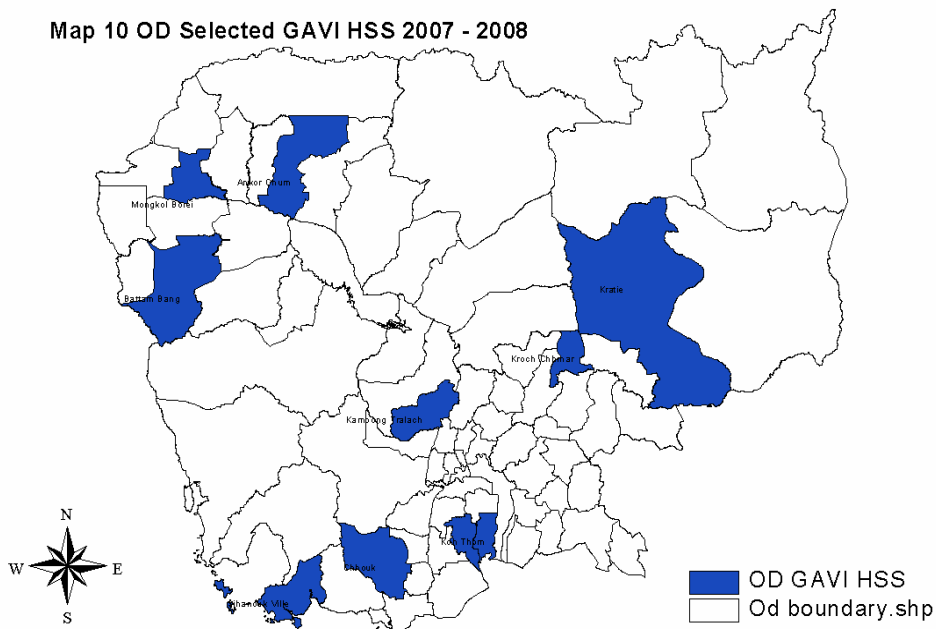

Support:

- Implemented in 10 ODs in 10 Provinces since last quarter of 2007: Performance Base Management Agreement (PBMA) Contracted Signed Internal Performance Contract at ODs with 5 main indicators: 1.Total consultation, 2.Total ANC, 3. Total HepB0, 4.Total DPT-HepB3 and 5. Total Measles
- Since middle of 2008 UNFPA has supported reproductive health: 6.PNC visit, 7. Birth Spacing New Acceptor, 8.Birth spacing Client).

3

Map 10 OD Selected GAVI HSS 2007 - 2008

Major Activities Conducted HSS

- ❖ PBMA contracts introduced to 10 PHDS/10 ODs for implementing a package of MPA Health Services. (EPI , Consultation , IMCI, and Reproductive Health)
- ❖ Assessment of Planning Manual Implementation Conducted
- ❖ Development of “Financial Management Manual for PHD, OD and HC and allocation of budget to all PHD bank accounts.
- ❖ Conducted IMCI Clinical Training Courses
- ❖ Outreach Guideline Review conducted
- ❖ Immunization training, CIP, Fixed Site, Communication WS

5

HSS System Development

- **Internal contracts system** introduced
- Decentralised **financial management system** introduced
- **Planning system** strengthening through training and integrated HSS into Annual Operational Plan (AOP)
- enhancing Civil Society and NGOs to Participate in Government/Ministry *Health Strategic Plan and AOP*.
- Join Supervision and M&E of Program.

6

Outcome Indicator in 10 ODs in 2008

Indicator	Numerator	Denominator	Baseline Value (MoH)	Baseline (MoH)	Target	Date for Target	Current status
1. National DPT – HEPB 3 coverage (%)	Children vaccinated DPTHeP3	Children < 1 in 10 HSS ODs	74.2	2006	90	2015	79.9
2. Measles Coverage	Children vaccinated with measles	Children < 1 in 10 HSS ODs	70.4	2006	90	2015	77.9
3. % pregnant women who have at least 2 ANC visit from a trained health professional	% pregnant women with 2 ANC visit	Expected pregnant women	49	2006	90	2015	71.7
4. Proportion of deliveries attended by trained health staff	% delivery by professional staff	expected pregnancy	35.3	2006	90	2015	47.2
5. % Delivery at Facility	% delivery at health centre or hospital	expected pregnancy	21.0	2007	34.4	2015	35.80
6. % Hepatitis Birth Dose	Children vaccinated with hepatitis B	Children < 1 in 10 HSS ODs	25	2005	65	2015	46.9

DPT-HepB3

Measles

ANC 2 Visit

10

Delivery at Health Facility

11

Delivery By Trained Staff

12

Interpretation of Data:

- In general, immunization coverage in Cambodia has been improving in recent years.
- Early results from HSS contract Districts indicates that lower performance districts can improve accessibility through HSS support (contracts, performance payments, improved financial and planning systems)
- Utilization of health facilities in particular is improving
- These indicators will be assessed by the interdepartmental monitoring team on a quarterly basis.

13

Strengths of HSS Program at PHD,OD and HC levels:

- The internal contracting System is strengthening management at HC and OD
- Budget is being received on time, so MPA activity is increased
- HSS program monitoring to contract HCs by ODs
- Public sector backing and reassurance to private sector participation in health sector and other.
- Understanding roles , responsibilities and expectation among both parties.

14

Weaknesses of HSS Program at PHD,OD and HC levels:

- ❖ There is lack of clarity on the quality of data and insufficient financing of coordinated monitoring and DQA at PHD and OD level
- ❖ Need comprehensive CPA/MPA package for internal contracting system
- ❖ Although quantitative indicators are good, there is not enough emphasized on quality of service delivery.
- ❖ Clarity in provincial technical working group for health is still evolving.
- ❖ Lack of appropriate regularly monitoring and evaluation.

CONCLUSION

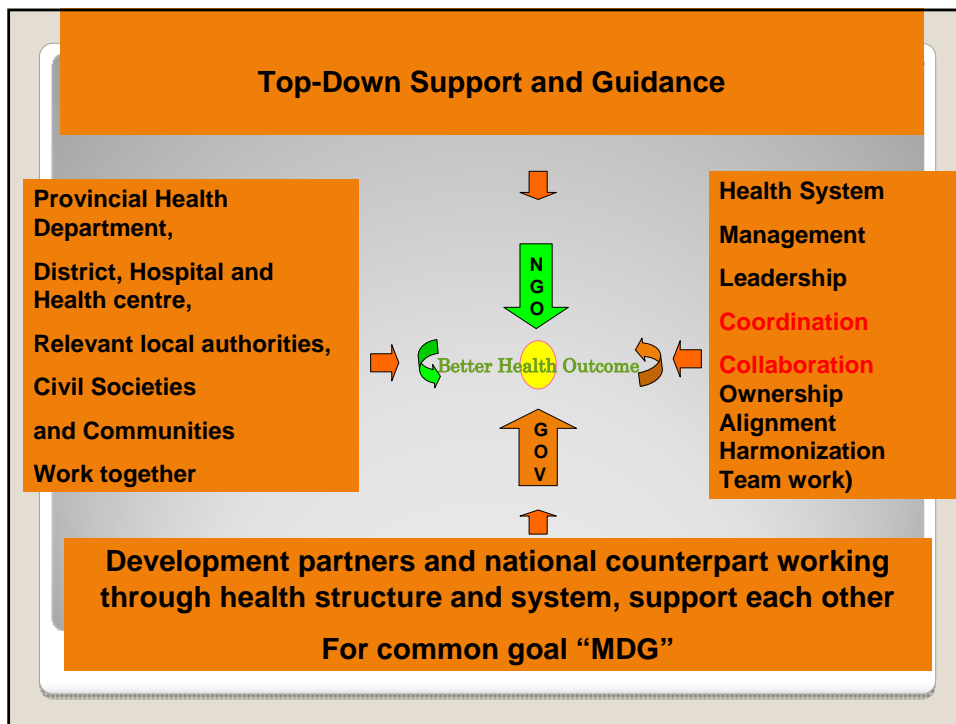

Prevention of Threats:

- Decreasing the conflict of interest through opened communication and sharing information.
- Reducing of burden and up leadership and ownership/creativity.

Development of Opportunities:

- Scaling up service delivery and harmonizing management systems.
- Management procedures and clear agreements to be established .

Thank You for your Attention!
